

## **LEARNING OBJECTIVES**

**4-28-22**

### **PERFORMANCE GAP/ ACTIVITY NEED:**

Palliative care is an interprofessional specialty focused on symptom management, quality of life, and relief of distress for patients who are living with serious illness as well as their families. The program will focus on palliative care metrics and transdisciplinary teamwork in terms of caring for the seriously/terminally ill patient.

**DESIRED OUTCOMES:** At the end of the activity, attendees will be able to:

- *1. Utilize Specialty Care Palliative service in the care of Seriously Ill Patients*
  - *Palliative Care is a key service area in achieving RCV metrics*
  - *Our inpatient Team & Referral Process*
- *2. Integrate Palliative Care when managing Seriously Ill patients with complex psychosocial and spiritual needs*
- *3. Incorporate Goals of Care discussions based on the Serious Illness Guide framework*

**LEARNERS:** All clinicians including, social workers, PA and NP as well as all ancillary clinical staff.

**PHYSICIAN ATTRIBUTES:** interdisciplinary team; physician/patient communication

**CLC/IB IDENTIFIED:** communication, language fluency, age
