

## **LEARNING OBJECTIVES**

**1-22-19**

### **DESIRED OUTCOMES**

At the end of the presentation, attendees will be able to:

- determine which population is most at risk for c. diff infection.
- determine what improved hygiene practice can reduce MRSA infections following hospital discharge.
- evaluate the appropriate antibiotic duration for most cases of hospital acquired pneumonia.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with antibiotic prescribing and/or cultural disparities in access, or less adherence to treatment regimens
