

LEARNING OBJECTIVES

4/19/18

DESIRED OUTCOMES

At the end of the presentation, attendees will be able to:

- describe the clinical presentation, epidemiology, and pathophysiology of soft tissue sarcomas.
- conduct an appropriate work-up, including history & physical, lab and imaging studies, and make the differential diagnosis.
- appropriately stage and treat soft tissue sarcomas, according to the latest best practice guidelines.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with soft tissue sarcomas and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
