

## LEARNING OBJECTIVES

5-21-20

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- dispel myths and fears regarding COVID-19.
- implement safe practices for patients and staff flow when re-opening the office.
- discuss the lack of evidence behind antibody testing.
- recognize the evolving spectrum of patient presentations.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with COVID-19 and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
