

LEARNING OBJECTIVES

5-26-20

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- identify cancer patients at risk for severe illness from COVID-19, as well as those in emotional distress.
- evaluate strategies for delivering care to COVID-19 infected and non-infected cancer patients.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with cancer patients and COVID-19 and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
