

LEARNING OBJECTIVES

6-20-19

DESIRED OUTCOMES

At the end of the presentation, attendees will be able to:

- recognize similarities and differences in the incidence and prevalence of hypertension among men and women during aging.
- recognize the importance of controlling risk factors to reduce the incidence of primary hypertension in women.
- analyze new recommendations for hypertensive treatment.
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with hypertension and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
