

LEARNING OBJECTIVES

3-2-21

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- describe current best practices with respect to COVID-19 treatment.
- explain how the emergence of variants may impact a future surge.
- differentiate between the different COVID-19 vaccines that have been authorized in the United States.
- answer patients' questions about post-vaccine activities
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with COVID-19 and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.

LEARNERS: all clinicians

DESIRABLE PHYSICIAN ATTRIBUTE: provide patient-centered care, apply evidence-based practice
