

LEARNING OBJECTIVES

6-22-21

PERFORMANCE GAP/EDUCATIONAL NEED: There are numerous challenges to organ donation, including care coordination and clear communication.

DESIRED OUTCOMES: At the end of the presentation, participants will be able to

- discuss the organs, tissues, and parts that can be donated.
- discuss the issue of supply and demand of donor organs and tissues.
- outline the process of organ and tissue donation and recovery
- describe barriers to successful organ and tissue procurement among the public and healthcare professionals.
