

LEARNING OBJECTIVES

6-7-22

PERFORMANCE GAP/ ACTIVITY NEED: The attacks and incidents of workplace violence including stabbings and shootings are continuing and alarming. Being prepared is one of the best methods to avoiding and surviving violence in hospitals. The information presented and the takeaway skills should be implemented for all physicians and staff on a continuing basis to provide the opportunity to avoid, diffuse, and survive serious assailant incidents. [Source: MMooring, 6/6/22, personal communication]

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- incorporate the principles of Awareness, Vigilance, Avoidance, Defense and Escape as applied to workplace violence prevention in healthcare.
- respond to threatening and actual armed assailant incidents.
- respond to an active assailant/shooter using Run – Hide - Fight

LEARNERS: all clinicians and staff

DESIRABLE PHYSICIAN ATTRIBUTE: communication, preparedness
