

## LEARNING OBJECTIVES

4-14-22

**PERFORMANCE GAP/ ACTIVITY NEED:** Globally, breast cancer is the most frequently diagnosed cancer and the leading cause of cancer death in women. In the United States, breast cancer is the most commonly diagnosed cancer and the second most common cause of cancer death in women. Breast cancer is treated with a multidisciplinary approach involving surgical oncology, radiation oncology, and medical oncology, which has been associated with a reduction in breast cancer mortality [Source: UpToDate].

**DESIRED OUTCOMES:** At the end of the activity, attendees will be able to:

- describe the molecular heterogeneity and challenges in treatment of breast cancer.
- determine indications, safety, efficacy, and long-term outcomes of systemic therapy, immunotherapy, and newer drugs in the treatment of breast cancer.
- describe racial inequities in the screening, diagnosis and treatment of breast cancer.

**LEARNERS:** surgeons, medical/radiation oncologists, geneticists, OBGYN, internists, general/family practitioners, radiologists, pathologists, pharmacists, research

**DESIRABLE PHYSICIAN ATTRIBUTE:** provide patient centered care, employ evidence-based practice
