

LEARNING OBJECTIVES

10-3-23

PERFORMANCE GAP/ ACTIVITY NEED: Guidelines for breast cancer screening have recently changed. It is important to improve compliance with current breast cancer screening guidelines in order to increase the chance of early detection of breast cancer and decrease mortality and morbidity. [Source: RZarifa, MD: personal communication, 9/25/23].

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- describe various presentations of breast cancer and current statistics.
- identify those most at risk for breast cancer.
- evaluate current breast cancer screening guidelines and modalities used.

LEARNERS: radiologists, medical/radiation oncologists, geneticists, surgeons, pathologists, OB/GYN, internists, general/family practitioners

DESIRABLE PHYSICIAN ATTRIBUTE: provide patient-centered care, employ evidence-based practice

CULTURAL/LINGUISTIC DIVERSITY/IMPLICIT BIAS (AB241) Reflect on the patient populations most affected and consider how implicit bias may impact appropriate care of these patients. Minoritized individuals have a large burden of disease, with poor access to treatment and diagnostic paradigms.
